Interests:

- Photography
- Travelling
- Contemporary Art
- Music

Qualifications:

BA (Hons) Photography
2014 - 2017
The Arts University
Bournemouth
BA First Class Honors

Full Clean UK Driving License
USA iVisa Valid for 5 Years
FAA USA Drone Licence
A2CofC UK Drone Licence
EASA EU Drone Licences
First Aid Trained
CCA Certified
PADI Advanced Diver

Technical Skills:

Camera Operating
Camera Assisting
Focus Pulling
Drone Operating
Remote / Hostile Location Ops
Gimbal Operating
8K Motion Time lapse
Macro Photography
Editing in Adobe Premier Pro,
FInal Cut & Davinci Resolve
DIT

Scientific Skills:

GPS Tracking
Camera Trapping
Species Identification
Transect & Benthic Surveys
Marine Surveys
Turtle Monitoring
Nudibranch Research

Documentary:

Focus Puller / Drone Op - Wildstar 'Planet Pet' Nat Geo / Disney+ *July-Pres 2026*
Planet Pet takes a deep dive into the bodies and minds of the animals closest to us: our pets. Filmed across the UK, California and Switzerland. Kit included; RED V Raptor, Sigma Primes, Ronin 4D & Typoch Simera Primes, Inspire 3 & Mavic 4 Pro.

Focus Puller / 1st AC - Jodi Arias Doc Miniatures - Netflix *July 2026*
Focus pulling for Simon De Glanville on a Netflix True Crime documentary produced by Dorothy Street Pictures, about the murderer Jodi Arias. Based out of 69 Drop studios, we spent a week filming a miniature set of the crime scene using a RED Raptor on 6-axis Mo-Co rig w/ Contax Primes & Laowa Probe2Probes.

Second Camera / Focus Puller - Dinner To Save The World - PBS *Jun-Sept 2026*
Dinner to Save the World (PBS), presented by M. Sanjayan and Sam Kass, looks at how the global food industry contributes to climate change. The series shows how changing the way we farm, process and eat food can help build a more sustainable future. Between June-September 2026 we filmed in UK, France, Norway & Scotland with a Sony FX6, Ronin 4D, Typoch Simera Primes & Angenieux EZ Zooms.

Focus Puller - Razorbill Films 'Just a Fly' Short Film *June 2026*
Focus Pulling for Ruben Woodin Dechamps on the short film *'Just a Fly'* produced by lian Mitchell. Just a fly questions the sentience of flies, posing the question - should they be treated any differently to any other being? Many of the interviews and scenes were shot as a fly POV. Kit included RED Raptor, specialist fisheye lenses: Century Optics (S16) 3.5mm 2.8, Laowa 8-15mm PL Fisheye & the Laowa Probe 24mm T14.

Cinematographer (Long Lens) - The Edge 'Day Of The Camel' *Nov 2025-Oct 2026*
Filming over 5-Months, *Day Of the Camel* is a feature documentary, exploring the connection between Humans and Camels across the world, from Kenya to Mongolia, and Saudi Arabia to India. My role on the project was almost exclusively shooting on long lens (CN20), cross-shooting every scene, picking up moments of emotion, connection, and covering some high-octane races and Camel events. Aside from CN20, the entire project was shot on Anamorphics, including the aerials. Other kit included, RED Raptors, DJI RS4 Gimbal, DJI 4D, Inspire 3 and a Mavic 4 Pro.

Second Camera - Wildstar 'Animal Oddballs' Nat Geo / Disney+ *Sept-Oct 2025*
Operating 2nd Unit, filming White Terns on an uninhibited island in the Seychelles for *'Animal Oddballs'* with Ryan Reynolds. Due to the complexity of filming the behavior, the sequence presented itself with some creative challenges. This included high-speed 'egg drops', with a camera falling at the same pace as the eggs falling - this involved balancing a Raptor with a Probe2b, on a RS4 Gimbal, on a Teris Mini Jib. Aside from this, the shoot required aerials (I3) and multiple remote cameras (FR7s),

mounted on trees, monitoring nests. Back on the ground my unit also focused on polished slider shots establishing various nest locations and building a montage sequence using the Disney film ‘Up’ as a reference.

Second Camera - BBC NHU ‘HOME: ASIA’ National Geographic *May 2025*
Operating 2nd Unit alongside Pete Cayless, filming a sequence about Dung Beetles, in Wadi Rum, Jordan for 3 weeks. With a combination of Studio and Location setups, we used Red Raptors, Phantom VEO’s and a selection of specialist Macro Lenses and lighting to capture the story.

Cinematographer - ‘Wild London’ with David Attenborough, BBC *April-Nov 2025*
Wild London, which received 5-star reviews from the Guardian & Telegraph, as well as being the 4th most watched BBC program in Jan 2026 (6.6M), aired on BBC One, New Years Day 2026. The one-off show tells the incredible stories of wildlife that call London their home. Acting as a key cinematographer on the show, I shot sequences such as Fallow Deer in East London, Pigeons on the Underground and Snakes along Regents Canal. Aside from this, I also helped film multiple pieces to camera with Attenborough, and played a part in filming the Peregrine Falcons, Hedgehogs, Field Mice, Honey Bees, Dragonflies & Beavers, as well as various GV’s across the city.

Focus Puller/TL/Drone - Wildstar ‘Animal Oddballs’ Nat Geo / Disney+ *Feb-Mar 2025*
Drone Operating, Timelapse and Focus Pulling for Simon De Glanville on the second block of the Madagascar Labords Chameleon sequence for Animal Oddballs. My timelapse’s here included some crucial behavior, featuring a Male Labords death. Kit Included; DJI Inspire 3, 4-axis Mo-Co rig, Kessler Cine Shooter & Slider, Laowa Probe2Probe, Laowa Swords and Aperture lighting.

Focus Puller/2nd Camera- Wildstar ‘Animal Oddballs’ Nat Geo / Disney+ *Jan-Feb 2025*
Focus Pulling for Simon De Glanville on the second season of Underdogs with Ryan Reynolds. A Macro sequence about Pumpkin Toadlets, filming in a cloud forest above Rio De Janeiro, Brazil for four weeks. Kit included; Sony Venice 2, Phantom VEO, 4 axis Mo-Co rig, Aperture lighting, Infini Probe, and the new Laowa Swords & Probe2Probe lenses.

Focus Puller / AC - Plimsoll ‘Nightmares of Nature’ ITV & Netflix *Dec 2024*
Focus pulling for Simon De Glanville on block two of the macro Jumping Spider ‘Nightmares of Nature’ sequence for ITV/Netflix. Kit included; Sony Venice 2, Phantom VEO, 4 axis Mo-Co rig, Samsung Terrace, Aperture lighting, Infini Probe, and Laowa Probe2Probe lenses.

Focus Puller/TL/Drone - Wildstar ‘Animal Oddballs’ Nat Geo / Disney+ *Oct-Nov 2024*
Drone operating, Timelapse and Focus Pulling for Simon De Glanville, for the second season of Underdogs with Ryan Reynolds. A macro sequence following freshly hatched, Labords Chameleons in Kirindy Forest Reserve, Madagascar. Kit Included; Sony Venice 2, Phantom VEO, DJI Inspire 3, 4-axis Mo-Co rig, Kessler Cine Shooter & Slider, Laowa Probe2Probe, Laowa Swords and Aperture lighting.

Focus Puller / AC - Plimsoll 'Nightmares of Nature' ITV & Netflix *Sept-Oct 2024*
Focus pulling for Simon De Glanville on a number of Jumping Spider macro sequences set in Costa Rica. Kit included; Sony Venice 2, Phantom VEO, 4 axis Mo-Co rig, Samsung Terrace, Aperture lighting, Infini Probe, and the new Laowa Probe2Probe lenses.

Second Camera - Wildstar 'Sentient' *Nat Geo / Disney+* *Feb 2024*
Operating second camera alongside DOP Brendan McGinty, and Director Luke Wiles filming several snow scenes near Hallingskarvet National Park, Norway. Kit included 2x RED V Raptors, Ronin 4D, Sony FX3, Mavic 3 Cine & Canon CN20.

Second Camera / Drone Op / AC - BBC 'Human' *Nov 2023*
Operating second camera, drones and assisting DOP Tom Hayward, and PD Andrew Thompson on a new Landmark, presenter lead series for BBC Science on the evolution of Humankind. The shoot began in New Mexico, USA. Before heading south to Peru where we traveled into the Amazon Rainforest, and onward to the Andes, to the first discovered city in the Americas. Kit included; Sony Venice, FX6, A7SIII, Canon CN-E prime lenses, TLS Morpheus Zoom and my Mavic 3 Cine drone.

Second Camera / AC - Wildstar 'Sentient' *Nat Geo / Disney+* Oct *2023*
Operating second camera alongside DOP Brendan McGinty, and Director Luke Wiles filming whirling dervishes, and several other street scenes around Istanbul, Turkey. Kit Included, RED V Raptor, Ronin 4D, Panasonic S1H, Angenieux EZ's a various other Cine Primes.

Second Camera / Drone Op - Wildstar 'Sentient' *Nat Geo / Disney+* *Sept* - Oct *2023*
Operating second camera (long lens) and drone alongside DOP Simon De Glanville, across Atlanta and Los Angeles in USA. Over the two weeks, we filmed various human interstitials, as well as a lab experiment looking into fairness in primates and a master interview with primatologist and ethologist, Frans De Wall, which will be used throughout the 6 episodes in the landmark series. Kit included; Sony Venice 2, Canon CN20 & Mavic 3 Pro Cine.

Second Camera - Wildstar 'Sentient' *Nat Geo / Disney+* *Aug 2023*
Operating second camera (long lens) alongside DOP Brendan McGinty filming 'La Tomatina' festival in Buñol, Spain. Kit included: RED V Raptor, Canon CN20 and a S1H combined with the Bright Tangerine 'Prodigy' Air Deflector for shots in amongst the Tomato fight.

Second Camera / AC - Wildstar 'Underdogs' *Nat Geo* *July 2023*
Underdogs is a new series brought to Wildstar by Ryan Reynolds, which focuses on the 'underdogs' of the animal kingdom. On this shoot I operated as Second Unit - camera & drone as well as assisting the DOP Simon De Glanville, filming a behavioural sequence in Papua New Guinea of a species who relies on an active volcano as a source of heat for incubation. Kit included; RED Raptor S35, Canon CN20, a remote S1H camera kit, DJI Inspire 2 (X7) and Mavic 3 Cine drones.

Second Camera - Wildstar 'Sentient' ***Nat Geo / Disney+*** *June 2023*
Operating second camera alongside DOP, Paul Stewart and PD Joe Loncraine on a Macro shoot focusing on parasite infected molluscs. The shoot was UK based, filmed in a studio and partly out in the field. Due to the mind-altered state of the molluscs, we were able to get creative with the colour pallet, ambitious camera moves and cinematic references. To achieve this, we implemented Mohan Sandhu's 'Wazzmatron', a motorised 7-Axis rig, a modular roll axis (for dutch head), as well as macro positioners and the motorised TED Tango by Prosup. In terms of lenses, we used; Laowa Peri Probe, Tokina 100mm Macro, Laowa 25mm (2.5-5x), Laowa 15mm Macro and a set of Sigma Cine Primes. Cameras included my RED Raptor S35, Sony Venice 2, a RED Helium and X7 for the Inspire 2 drone.

Drone Op / AC - Loud Minds 'Surviving Earth' ***Universal / NBC*** *May 2023*
Surviving Earth is the brainchild of Timothy Haynes, the creator of Walking with Dinosaurs (1999). On this shoot, I operated drones and assisted the DOP Xavier Amoros. Working closely with the VFX, SFX teams and PD Dan Smith, we were located in USA, and met with number of challenging locations and ambitious shots. This included; flying an Inspire in dense Redwood forests in Northern California, and flying at speed through narrow slot canyons, or flying low across dry river beds in Utah. Kit included RED Raptor XL, Fujinon Premista 80-250mm, Zeiss Supreme Primes, Vaxiss wireless setups with multiple directors monitors, DJI Inspire 2 (X7) drone kit and my DJI Mavic 3 Cine drone kit.

Second Camera / AC - Wildstar 'Sentient' ***Nat Geo / Disney+*** *April 2023*
Operating second camera and assisting DOP, Simon De Glanville and PD Joe Loncraine filming a sequence for Sentient around a Jain Bird Hospital in the heart of Delhi, India. Kit included RED Raptor VV, Canon CN20 and a set of Sigma Cine Primes.

Second Camera / AC - Wildstar 'Sentient' ***Nat Geo / Disney+*** *April 2023*
Operating second camera and assisting DOP, Brendan McGinty and PD Joe Loncraine, filming across multiple sequences for two Sentient episodes in Chiang Mai, Thailand. Kit included using rain deflection devices; Schulz SprayOff & Bright Tangerine Prodigy. Other kit included 2x RED Raptor VV, Canon CN20 and Angeniuex 22-60 & 45-135 FF Zoom lenses.

Drone Op / AC - Loud Minds 'Surviving Earth' ***Universal / NBC*** *Jan-Feb 23'*
Operating second camera, drone and assisting of DOP's, Simon de Glanville & Teemu Liakka, for another episode of the VFX series, Surviving Earth, produced by Mathew Dyas. On this shoot, we were located in New Caledonia for six weeks filming both topside and underwater. My roles included; speccing the entire Surviving Earth kit purchase for the eight episodes, AC (topside and underwater), drone operating (Insprie 2 and Mavic 3 Cine) and second shooting. Kit includes; RED Raptor XL, Raptor VV, Chris Watt's Borescope, Fujinon Premista 80-250mm, Zeiss Supreme Primes, Terradek wireless setup and Nauticam housings for the Raptor VV.

AC - Wildstar - 'Sentient' ***Nat Geo / Disney+*** *Oct 2022*
Assisting DOP Simon De Glanville and PD Joe Loncraine for another of Wildstar's 'Sentient' shoots in Nepal. This sequence was mainly city based, and covered a human-wildlife story shot centre of Katmandu, Nepal. Sound was an important element, so naturally there was a lot of sync. The Arri Alexa 35 was used as the main

camera channel, paired w ith a A7SIII & Ninja V+ for gimbal work. Various Sigma and Zeiss primes were used across both cameras along with with some long lens.

Second Camera - Wildstar - 'Sentient' ***Nat Geo / Disney+*** *Aug - Sept 2022*
Operating second camera and shooting a sequence with DOP Tom Rowland for the first episode of Wildstar's new landmark series 'Sentient', directed by Darren Aronofsky for Nat Geo / Disney+. Based in Peru in the High Andes at an altitude of 4800m, Tom an I covered a sensitive wildlife story over the course of 4 weeks, supported by a 13 strong team. Kit included: Sony Venice 2, Red Helium, Canon CN20, Sigma Primes and Fujinon 19-90.

Shooting AP - ***Razorbill Films - 'The Danube Delta' - NHK*** *- Mar 2022 - Present*
Shooting AP at Razorbill Films for a 60 minute feature on The Danube Delta for Japanese broadcaster, NHK. Driving from London to Romania, and filming at various cities and locations along the Danube River, we eventually ended up at the mouth of the Delta where we were located for 6 weeks, filming Dalmatian Pelican, White Tailed Eagle, Golden Jackal, Cormorant, Bee Eaters and various other species that rely on the Delta for survival. Over the course of the shoot, we deployed several custom designed & built rigs, including a floating hide and a remote camera on a jackal den, partially solar powered and operated from a hide 300m away.

AC - ***Studio Silverback - 'Earth Shot'*** **BBC 1**- *April - July 2021*
Assisting award winning cinematographer Brendan McGinty over five days on BBC One's 'Earthshot Prize' Episode 5 'Build a Waste-Free World', narrated by Sir David Attenborough and Prince William. Roles included: camera assisting, DIT, sound recording, stills photography & field running.

Shooting AP - ***Razorbill Films - 'Fallow Deer' - NHK*** *- Mar 2021 - Feb 2022*
Shooting AP at Razorbill Films for a 60 minute feature on Fallow Deer for Japanese broadcaster, NHK. Involving: writing pitches, shooting scripts, research documents and preparing Carnets. Contacting scientists, organisations and researchers. Designing custom camera rigs and housings, topside self-shooting and drone operating. Ingesting rushes, creating proxies and making selects. Putting together behavioural sequences, editing and HLG HDR grading. Creating 4K DNXHR HQX broadcast ready masters.

PD (Self Shooting) - ***'Madagascar: Paradise in Peril'*** *- May - Jul 2015*
A natural history documentary highlighting Madagascar's unique biodiversity, endemism and the many endangered species. Filmed over 15 species of Lemur, including some of the rarest such as the Mouse Lemur, the worlds smallest primate. Also captured the islands top predator, the Fossa in situ as well as many endemic Insects and Chameleons such as Giraffe Weevils or Brookesia Stumfi. Included: Traveling over 3,000km by road (or lack thereof), trekking through dense primary rainforest with kit, intense hikes and night walks. Involved: long lens shooting, time lapses, macro photography, controlled LED lighting setups, camera trapping and GPS tracking. Screened in Peckham 19/04/18

NGO / Charitable:

PD (Self Shooting) - *Madagascar Research & Conservation Institute* - *Jun 2019*
A documentary filmed in collaboration with non profit MRCI, highlighting the rising concern of ocean plastics off the northern coast of Madagascar. Included: a five day research expedition by boat, weathering storms and sleeping on beaches. Communicating with fixers, translators, scientists, government officials and setting up interviews in Malagasy & French. Involved: drone and gimbal operating in tricky locations and in unforgiving conditions, underwater photography and 8K time lapses.

PD (Self Shooting) - *Foundation of Education & Development, Thailand* - *Mar 2019*
In a commission by FED, this short film follows the story of Komkai, a 16 year old Burmese migrant. Originally born in Myanmar during a time of extreme civil unrest she and her family migrated to Ranong, Thailand to seek refuge. Included: interviews with minors and sensitive subjects, permits and protocol involved with filming in schools and foreign language interviews.

PD (Self Shooting) - ***Inspirasia Foundation, Indonesia*** - *Dec 2018*
Six documentary style short films for Inspirasia Foundation, an NGO supporting a number of charities in Bali and Indonesia, with initiatives ranging from sexual health education, disability support & prosthetics, rehabilitation and poverty relief. Included: extensive filming in extreme environments, from thick jungles in the far east, to a village perched on the edge of the volcano, Mt Agung. Involved: setting up foreign language interviews and dealing with some highly sensitive subject matters. Involved: Gimbal and shoulder rigs, cinematic aerials and tracking shots from moving vehicles.

PD (Self Shooting) - ***Malta Social Impact Awards*** - *Dec 2018 - 2019*
Filming over several projects for MSIA, an initiative set up for non profits, social entrepreneurs and innovators to build a sustainable and positive social impact on Malta.
